

For Immediate Release

Hemisphere GNSS Appoints Randy Noland as New VP of Global Sales

Scottsdale, AZ – December 10th, 2015 – Hemisphere GNSS announced today that Randy Noland has joined the company as Vice President, Global Sales to further support the expanding portfolio of Hemisphere's national and international accounts.

Randy brings a wealth of industry expertise and knowledge to Hemisphere. He has more than 30 years of proven experience in GNSS OEM, application software, and machine control markets, having spent the last 8 years with Carlson Software as the VP/Director of Machine Control where he was instrumental in acquiring numerous large accounts.

Noland's marketing experience is wide and varied with notable achievements as the Co-founder and Managing Editor of Machine Control Magazine as well as his position as Product Marketing Manager, Machine Control, with Topcon.

"Randy is a proven executive with the experience and expertise to lead Hemisphere's Global Sales organization," said Chuck Joseph, CEO of Hemisphere GNSS. "Over the course of his career, Randy has repeatedly demonstrated the ability to develop key corporate accounts and grow sales organization structures which enable companies to scale globally. His understanding of our business, significant international experience, and deep OEM and GNSS industry experience make him ideally suited to lead Hemisphere GNSS' Global Sales organization."

"Hemisphere has long been recognized for its pioneering and trend setting high-precision GNSS technology, and I look forward to leading the company's talented sales team as we make the strategic decisions necessary to expand our market share and OEM presence globally," said Mr. Noland.

Mr. Noland will report directly to Chuck Joseph, CEO and President of Hemisphere GNSS, and his appointment is effective immediately.

About Hemisphere GNSS
