Eclipse™ Vector™ H328
GNSS OEM Board

ADVANCED
HEADING AND RTK
POSITIONING

Scalable Solutions
With the Vector H328, positioning is scalable and field upgradeable with all Hemisphere software and service options. Use the same centimeter-level accuracy in either single frequency mode, or employ the full performance and fast RTK initialization times over long distances with multi-frequency multi-constellation GNSS signals. High-accuracy L-band positioning from meter to sub-decimeter levels are available via Atlas correction service.

Ease of Migration
Leverage the industry standard form factor for easy upgradeability from other manufacturers’ modules.
