

For Immediate Release

Hemisphere GNSS Announces Opening of New Brisbane Australia Facility

Facilities expansion strengthens and supports Hemisphere's global strategy for the machine control & agriculture marketplace

Scottsdale, AZ, USA – July 1, 2020 – Today, Hemisphere GNSS, Inc. (Hemisphere) announces the addition of a new office and fulfillment facility in Brisbane, Australia. This new Australia office aligns with Hemisphere's continued push into the global Machine Control and Agriculture markets. The new Hemisphere GNSS Australia office will support Hemisphere's growing demand for its well-established Outback Guidance Agriculture Steering Solutions product line and rapidly growing GradeMetrix Machine Control suite of solutions.

Hemisphere's new Brisbane, Australia facility will also provide and manage logistics and inventory for our growing sales in the Australia and APAC regions into OEM (original equipment manufacturer), VAR (value-added reseller), and all other segments of the Australian construction and agriculture technology sectors. Product development, sales, and support functions round out HGNSS' full-service facility.

"Hemisphere's highly-knowledgeable personnel and expanding dealer network in this region will provide us with a key component of the Machine Control and Agriculture supply chains that perfectly complement Hemisphere's current global strategy," said Randy Noland, Vice President of Global Sales & Business Development with Hemisphere GNSS. "In conjunction with the facility announcement, we are happy to announce our Brisbane facility is staffed with Sales, Operations, and Support personnel with over 40 years combined experience."

The opening of our Hemisphere Australia office represents HGNSS' ongoing commitment to make significant investments to expand Hemisphere's presence in the global Machine Control and Agricultural markets. Hemisphere has seen success and wide-reaching positive feedback in recent years, boasting the world-class Athena™ RTK GNSS Engine, Atlas® Global GNSS Correction Services, and OEM-focused products. We seek to further integrate our high-precision GNSS Positioning technology via systems and services offered by the Hemisphere's Channel Partners.
